Dear Valued New Patient:

We would like to thank you for contacting us recently because of your interest in Sleep Apnea treatment and/or TMJ treatment. Our office goal is to help make your life more enjoyable through excellent care.

Our **Center for TMJ and Sleep Disorders** is one of a few offices devoted to these conditions. Our diagnostic equipment is highly advanced as are our treatment methods.

Perhaps you, like many of our patients, have unsuccessfully sought help elsewhere or found that the help you received was just not going to work for you in your situation. By offering you Sleep Apnea/TMJ treatment, our office can take proactive steps to provide increased quality of life. Our staff can assure you that we will do our best to help improve your condition(s).

Please find enclosed our Patient Health Questionnaire for you to complete along with other forms and bring them in with you on your first appointment. Please list all medications (including vitamins), the dosage and frequency of administration. If we've requested that you fax us your most recent sleep study, please have it to us prior to your appointment. Also, bring in your medical card.

If you have any additional questions or need more information, please feel free to contact our office or visit our website at www.centerforsleptmj.com. We will be looking forward to meeting you and thank you again for your interest.

Sincerely yours,
Marc E. Segal, D.D.S.

INSURANCE QUESTIONS

Insurance benefits are based on the type of policy you have chosen. Treatments relating to Sleep Apnea and dysfunctions of the TMJs are usually a covered benefit under medical insurance but are subject to deductibles and co-payments. The exceptions would be HMO plans and/or any plans that have written specific exclusions or limitations relating to both of these conditions.

When you come in on your first visit we can give you specific information regarding your plan.
